ABOUT THE INDEX: The Council for Community and Economic Research (C2ER) produces the *ACCRA Cost of Living Index* to provide a useful and reasonably accurate measure of living cost differences among urban areas. Items on which the Index is based have been carefully chosen to reflect the different categories of consumer expenditures. Weights assigned to relative costs are based on government survey data on expenditure patterns for professional and executive households in the top income quintile. All items are priced in each place at a specified time and according to standardized specifications.

Because the number of items priced is limited, it is not valid to treat percentage differences between areas as exact measures. Since judgment sampling is used in this survey, no confidence interval can be determined. Small differences, however, should not be construed as significant—or even as indicating correctly which area is the more expensive.

INTERPRETING THE INDEX: The *ACCRA Cost of Living Index* measures *relative* price levels for consumer goods and services in participating areas. The average for all participating places, both metropolitan and nonmetropolitan, equals 100, and each participant's index is read as a *percentage* of the average for all places.

The Index does not measure inflation (price change over time). Because each quarterly report is a separate comparison of prices at a single point in

time, and because both the number and the mix of participants changes from one quarter to the next, ***Index data from different quarters cannot be compared.*** For inflation data, contact the US Bureau of Labor Statistics (BLS) at www.bls.gov.

The *Index* reflects cost differentials for professional and executive households in the top income quintile. Operationally, this standard of living is set by the weighting structure. Homeownership costs, for example, are more heavily weighted than they would be if the *Index* reflected a clerical worker standard of living or average costs for all urban consumers. (Weights for component indexes appear above column headings—e.g., 13.31% for Grocery Items.)

PARTICIPATING AREAS: Areas included in this survey are those where organizations have volunteered to participate. The number of respondents varies from quarter to quarter, and C2ER makes a continuing effort to expand coverage of metropolitan areas. Any metropolitan area not represented in this report is absent because local organizations have opted not to collect data. ***C2ER has no data for areas that do not appear in this report.***

PRICE REPORTING: C2ER stringently reviews all prices reported, and attempts to eliminate errors and noncompliance with specifications. All price data are obtained from sources deemed reliable, but no representation is made as to the complete accuracy thereof. They are published subject to errors, omis-

sions, changes, and withdrawals without notice.

SPECIFICATIONS: The specific items priced are listed on page iii. Abbreviated specifications for all items are presented only as a guide to users of this report; far more detailed specifications are contained in the manual that governs pricing, which may be found at www.coli.org.

EXCLUSION OF TAXES: C2ER is fully aware that state and local taxes are an integral part of the cost of living, and that tax burdens vary widely among states and metropolitan areas and within metropolitan areas. Due to the multiplicity of state and local taxes, taxing jurisdictions, and assessment procedures, it is not feasible to calculate local tax burdens reliably. C2ER has opted to produce an index that adequately measures differences in goods and services costs, rather than to produce an inaccurate measure that attempts to incorporate taxes levied on real and intangible property, retail purchases, and income.

TWO SECTIONS OF QUARTERLY DATA: The *ACCRA Cost of Living Index* presents data in two sections:

URBAN AREA INDEX DATA: This section shows each place's Composite Index and six component indexes—Grocery Items, Housing, Utilities, Transportation, Health Care, and Miscellaneous Goods and Services. Places are listed by state. Within each state, places appear alphabetically within

metropolitan area, metropolitan division or micropolitan area in the United States. C2ER has adopted the new metro and micro area definitions announced by the US Office of Management and Budget (OMB) on June 6, 2003.

Data users who opt to use suburban places as surrogates for central cities should be aware that living cost differences can exist within large metropolitan areas. This caution is particularly important where there are substantial differences in housing costs and/or utility rates.

AVERAGE PRICES: The average price reported for each item in this survey is shown for each place that has participated in at least two of the three previous pricing periods. Places are listed alphabetically within state, without respect to metropolitan or micropolitan status. After the final state listing, this section presents the median, average, standard deviation, and range for each item.

mitted to reproduce tables in part to illustrate text, provided appropriate credit is given to C2ER. They are granted no other reproduction rights. Participants may post on their Internet sites index data (but not average prices) for their area, for any areas over 2 million population, and for no more than five other areas. Other Internet posting of any *ACCRA Cost of Living Index* data without written permission from C2ER is prohibited.

Any questions about copyright policy or reproduction rights should be addressed to the C2ER Subscription Office.

C2ER: C2ER is a nonprofit professional organization comprising research staff of chambers of commerce, economic development organizations and agencies, and related organizations throughout the United States and Canada. In its dedication to improving business information through research, C2ER developed the *ACCRA Cost of Living Index* to meet the need for a measure of living cost differentials among urban areas. Originally titled *Inter-City Cost of Living Indicators Project*, the *ACCRA Cost of Living Index* has been published quarterly since 1968. The *ACCRA Cost of Living Index* is based on nearly 100,000 data points gathered primarily by C2ER members located in 400 cities. For more information about participating in this project or joining C2ER, please visit www.c2er.org or call 703-522-4980.

HOW TO USE THE ACCRA COST OF LIVING INDEX

Assume that City A has a composite index of 98.3 and City B has a composite index of 128.5. If you live in City A and are contemplating a job offer in City B, how much of an increase in your after-taxes income is needed to maintain your present lifestyle?

$$100 * [(City B - City A) / City A] = 100 * [(128.5 - 98.3) / 98.3] = 100 * (.3072) = 30.72\%, \text{ or about a 31\% increase}$$

Conversely, if you are considering a move from City B to City A, how much of a cut in after-taxes income can you sustain without reducing your present lifestyle?

$$100 * [(City A - City B) / City B] = 100 * [(98.3 - 128.5) / 128.5] = 100 * (-.2350) = -23.5\%, \text{ or about a 24\% reduction}$$

Price Report Column Headings

The items and specifications in this study are listed below. Descriptions for housing and utilities are abbreviated, since pricing is based on explicit procedural instructions and highly detailed specifications. Monthly costs for housing and energy are not communitywide averages, and should not be construed as such: they are specific to professional and executive households. • Establishment samples are selected to reflect a mid-management standard of living; minimum sample size depends on the population of the area for which data are collected. • To ensure uniformity, national brands are stipulated wherever possible. "Lowest price" is the average of the lowest prices found in all stores surveyed. • Weights are shown for the component indexes. • Weights are calculated by C2ER based on data extracted from the 2009 US Consumer Expenditure Survey, BLS.
